

DPF FLUSH

PROFESSIONAL DIESEL PARTICLE FILTER CLEANING KIT

DESCRIPTION

DPF FLUSH is a professional product designed to use with the Xenum DPF Flush Tool. Two step cleaning method for clogged Diesel Particle Filters without the need for disassembly and the high cost of replacing the DPF.

BASIC BENEFITS

- Smoother engine run.
- Improved engine & DPF reliability.
- Restores the proper functioning of the Diesel Particle Filter.

PROPERTIES

- Cleans and removes soot and carbon deposits from porous honeycomb structures like those present in the DPF.
- Prevent repeated build-up of soot in the particle filter.
- Non-inflammable, water base liquid.
- Metal-free cleaning liquid without leaving a residue.

APPLICATION

Use for problem-solving treatment where the DPF is clogged.
For all types of diesel engine with Diesel Particle Filter and catalyser.

XENUM specialists recommend to clean the injection system after cleaning the DPF, use XENUM Ultimax Diesel (REF: 3222350) or XENUM Complex Diesel (REF: 3031301) diesel additive.

DIRECTIONS FOR USE

Please read carefully the operating manual included with the DPF cleaning tool.
Operating manual is also available on request: info@xenum.be
