

COMPLEX DIESEL SYSTEM CLEANER

ADVANCED MULTIFUNCTIONAL DIESEL FUEL ADDITIVE

DESCRIPTION

Advanced multifunctional diesel fuel additive. Improves fuel injection & general performance of diesel engines and exhaust treatment systems.

BASIC BENEFITS

- Smooth and proper engine running, less noise and vibrations.
- Greater fuel economy.
- Increased power and engine dynamics.
- Improved engine reliability.
- Reduced toxic emissions and smoke.

PROPERTIES:

- Cleans and lubricates injectors and fuel systems.
- Keeps the EGR and DPF systems clean.
- Neutralizes water in the fuel tank.
- Protects the fuel system from corrosion.
- Protects distributor injector pumps from wear.
- Prevents seizing and the injectors needles from resinifying.
- Protects the fuel from oxidation and degradation.

APPLICATION

Use for both preventive and problem-solving treatment. Suitable for all Diesel engines including the latest generation directly injected CRD, TDI, JTD, HDI, with EGR, Diesel Particle Filter and catalyser.

Recommendation: For further maintenance of the improved condition is recommended the Diesel Multi Conditioner fuel additive (ref: 3185250) for every day use.

DIRECTIONS FOR USE

Add one can to fuel before filling. Mix 300 ml with a maximum of 70 litres of fuel.

TYPICALS

Physical state:	Liquid
Colour:	Amber
Boiling point (°C):	190
Flash Point (°C):	63
Ignition temp (°C):	205
Pour point (°C):	-33
Density @ 20°C:	0,824

PACKAGING

300 ml can (12 x 300 ml carton)
